

Mohamed Amine FRAD

Web Development Student | Junior Full-Stack Developer | IT Management Technician

+216 29 070 679 @ frad.amine@gmail.com Sousse, Tunisia

SUMMARY

Dedicated and passionate about web development, I am a web development student actively seeking an internship to gain practical experience and enhance my skills. With a solid foundation in both frontend and backend development, I am eager to contribute to innovative projects and collaborate within a dynamic team. My enthusiasm for learning and improving, combined with hands-on experience from academic projects and internships, ensures I can make a meaningful impact while continuing to grow as a developer. You can view my GitHub to explore my own projects and see the work I've done so far. It showcases both my frontend and backend skills and reflects my passion for web development. Feel free to check it out!

EXPERIENCE

Front-end Developer Intern

BeWise

07/2024 - 09/2024 Tunis, Tunisia

- Redesigned and developed an e-commerce website using WordPress, enhancing user experience through the integration of a seamless and secure payment system. This led to a 30% increase in customer satisfaction and a reduction in cart abandonment rates
- Redesigned and developed the frontend of the BeProcess platform, creating an intuitive user interface for managing users, groups, workflows, and forms, which led to a 20% increase in internal process efficiency.

Technologies used: Angular, WordPress, Spring Boot, Bootstrap, Git, WordPress, PHP, CSS, FileZilla.

Full-Stack Developer Intern

ZOUARI GROUP

06/2023 - 08/2023 Sousse, Tunisia

- Built a leave and request management application: Designed and implemented a web application with three user roles (Employee, HR, Department Approver), reducing request processing time by 30% and improving process transparency for departments.

Technologies used: PHP, MySQL, Bootstrap, CSS, JavaScript.

Application Developer Intern

Tunisie Telecom

08/2022 - 09/2022 Sousse, Tunisia

Worked on the development and optimization of manufacturing processes for defense systems.

- Automated debt follow-up processes: Developed a custom Excel application for client reminders and payment tracking, reducing manual processing time by 40%.
- Trained end-users to ensure smooth adoption of the application.

Tools used: Excel VBA, Macros.
